

Table of Contents

Chapter 1 Algebra Manipulations	1
Chapter 2 Radicals	7
Chapter 3 Solving Radical Equations	26
Chapter 4 Absolute Values	36
Chapter 5 Solving Absolute Value Equations	48
Chapter 6 Vieta Theorem and Applications	53
Chapter 7 Square Numbers	62
Chapter 8 Divisibility	70
Chapter 9 Geometry Congruent Triangles	83
Chapter 10 Geometry Area and Area Method	95
Chapter 11 Geometry Eight Methods To Draw Auxiliary Lines	109
Chapter 12 Trigonometry Six Functions	122
Chapter 13 Cubic Identities	133
Chapter 14 Arithmetic Sequence	139
Chapter 15 How to Use the Discriminant	155
Chapter 16 Completing the Square	162
Chapter 17 Analytic Geometry Distance and Lines	170
Chapter 18 Functional Equations	177
Chapter 19 Squeezing Method	185
Chapter 20 Nonnegative Numbers	191
Chapter 21 Geometry Similar Triangles	198

Chapter 22 Geometry Angle Bisector And Median	210
Chapter 23 Geometry Eight More Methods To Draw Auxiliary Lines	223
Chapter 24 Trigonometry Identities	231
Chapter 25 AM-GM Inequality	238
Index	249
